

# SHARK SM6

Three bands. Precise control. A sound you can shape.

## Master the movement

Steady the low end, bring the midrange into focus and shape the top end with independent compression or expansion. SM6 puts tactile controls, clear dB scales and direct monitoring into one mastering workspace.

## From subtle cohesion to parallel energy

Adjust all three thresholds together, explore a band on its own, or blend a stronger wet signal with the original mix. Add soft-saturation colour where it helps, then use level compensation to judge the result.

104 factory presets / 6 appearances / 1x-8x oversampling

Designed for mastering, mix buses and individual tracks. [sharkplugs.com](http://sharkplugs.com)

# A complete dynamics workspace

| Shape                              | Explore                                                        |
|------------------------------------|----------------------------------------------------------------|
| Three-band compression / expansion | Independent ratio, threshold, attack, release and makeup gain. |
| Master threshold & input trims     | Move the overall response, then refine the balance.            |
| SOLO & detector listening          | Hear the bands and the signals driving their dynamics.         |
| THD colour & parallel MIX          | Add soft saturation per band and blend wet/dry.                |
| Spectral and overall compensation  | Assess tonal and dynamic changes with useful level controls.   |
| A/B/C/D, Undo/Redo, favorites      | Keep alternatives close and return to good ideas.              |

## Choose your finish

Modern Black and Silver feature Apex controls. Vintage Black, Silver, Blue and Green offer the original scalloped knobs. Coloured glass switches show their active state, and precise scales remain consistent across every look.

## Start with the music

Explore mastering and mix-bus presets, then move into drums, bass, vocals, guitars and keys. Five in-house Studio Collections offer Precision, Punch, Warmth, Electronic and Natural starting points.

## Product information

Documentation edition v0.3.6. Current availability: source checkpoint; installer and final Mac/DAW validation pending. AU/VST3 targets configured. Original Shark digital processing. No third-party engineer endorsement is claimed.
